When: Sunday, December 16, 2012; 1:00pm

Where: Shepherdstown Fire Department

8052 Martinsburg Pike (Rt. 45), Shepherdstown, WV 25443

What: New Engine Dedication Ceremony

The Shepherdstown Fire Department (SFD) is thrilled to announce the dedication and placement into service of our new Engine 3. For two years the members of the Shepherdstown Fire Department have been planning and establishing the necessities to become a reality on this new Engine. Everything from the size of the water tank, to the placement of the flashlights has been a priority throughout the planning process. On December 16th, 2012 at 1pm the vision will become a reality as the members of the SFD will formally remove from service our 1989 Pierce Dash Engine, and replace it with our 2012 Pierce Velocity Engine. The ceremony will last approximately one hour and will include the formal removal of old Engine 3 and the formal wash and push in of new Engine 3. The surrounding community, mutual aid departments, and media outlets are strongly encouraged to attend this ceremony.
